RE: Support for H.R. 4735, the Mine Affected Community Energy and Environment Act

Dear Congressman Boyle:

I am writing to you today on behalf of more than 1200 active and retired members of Boilermakers Local Lodge No. 13 in Philadelphia, PA. My members work predominately in coal-fired power plants across Pennsylvania, parts of Ohio and West Virginia.

The legacy of this nation's mining industry has been left to our current citizens, who must cope with the myriad of issues posed by abandoned mine lands (AML) and millions of tons of coal refuse strewn across the landscape of our communities. Coal refuse piles pollute the land, water and air with uncontrolled emissions from burning refuse piles and contamination of land and water resources with acid runoff and sedimentation.

The coal refuse reclamation to energy industry delivers substantial economic and environmental benefits as a vital partner in the effort to address the problems associated with AML sites. In Pennsylvania alone, over the past 30 years this industry has removed more than 225 million tons of coal refuse, reclaimed at least 7,200 acres of mine-scarred land and restored over 1,200 miles of impaired streams, but there is still more work to be done.

The industry also represents a major source of economic activity and family-sustaining employment. The facilities in Pennsylvania annually produce \$615 million in annual economic benefit, supporting 3,000 Full-Time Equivalent jobs annually. These benefits are concentrated in historic coal communities that face significant existing challenges. The legislation has the support of countless community environmental groups from western Pennsylvania, along with the support of the IBEW, the Boilermakers, the Building Trades and other labor groups.

We ask that you join Representatives Meuser, Cartwright, Lamb, Wild, Evans and other colleagues from your Pennsylvania Congressional Delegation as a Co-Sponsor of H.R. 4735, the Mine Affected Community Energy and Environment Act. This legislation is critical to address the health, safety and environmental costs imposed on local communities by our nation's coal mining legacy and continues a longstanding public-private partnership with coal refuse reclamation to energy facilities that remove polluting coal refuse piles and reclaim AML sites.

We support the Mine Affected Community Energy and Environment Act, H.R. 4735 and urge the United States Congress to pass this legislation encouraging the continued efforts of coal refuse reclamation to energy facilities to address the legacy of coal mining by restoring our land, air and streams while providing an alternative source of electricity and thousands of family-sustaining jobs.

Respectfully,

John D. Bland
Interim Business Manager
Boilermakers Local Lodge No. 13
