RE: Support for H.R. 4735, the Mine Affected Community Energy and Environment Act

Dear Congressman Meuser and Cartwright:

I am writing to you today on behalf of more than 800 active and retired members of the Laborers' Local Union 910. Our members work in coal-fired power plants across Western Pennsylvania.

The legacy of this nation's mining industry has been left to our current citizen, who must cope with the myriad of issues posed by abandoned mine lands (AML) and millions of tons of coal refuse strewn across the landscape of our communities. Coal refuse piles pollute the land, water and air with uncontrolled emissions from burning refuse piles and contamination of land and water resources with acid runoff and sedimentation.

The coal refuse reclamation to energy industry delivers substantial economic and environmental benefits as a vital partner in the effort to address the problems associated with AML sites. In Pennsylvania alone, over the past 30 years this industry has removed more than 225 million tons of coal refuse, reclaimed at least 7,200 acres of mine-scarred lands and restored over 1,200 miles of impaired streams, but there is still more work to be done.

The industry also represents a major source of economic activity and family-sustaining employment. The facilities in Pennsylvania alone produce \$615 million in annual economic benefit, supporting 3,000 Full-Time Equivalent (FTE) jobs annually. These benefits are concentrated in historic coal communities that face significant existing challenges.

We commend your leadership on this issue by introducing H.R. 4735, the Mine Affected Community Energy and Environment ACT, H.R. 4735 and urge the United States Congress to pass this legislation encouraging the continued efforts of coal refuse reclamation to energy facilities to address the legacy of coal mining by restoring our land, air and streams while providing an alternative source of electricity and thousands of family-sustaining jobs.

Respectfully,

Douglas E. Telenko
Business Manager
