Congressman Dan Meuser  
326 Cannon House Office Building  
Washington, DC 20515

**RE: SUPPORT**

**H.R. 4735, the Mine Affected Community Energy and Environment Act**

Dear Congressmen Meuser:

The legacy of Pennsylvania's mining industry has been left to our current citizens, who must cope with the myriad of issues posed by abandoned mine lands (AML) and millions of tons of coal refuse strewn across the landscape of our communities. I can personally attest that coal refuse piles scar the land and water with acid runoff and sedimentation.

The coal refuse reclamation to energy industry delivers substantial economic and environmental benefits as a vital partner in the effort to address the problems associated with AML sites. In Pennsylvania alone, over the past 30 years this industry has removed more than 225 million tons of coal refuse, reclaimed at least 7,200 acres of mine-scarred land and restored over 1,200 miles of impaired streams, but there is still more work to be done.

The industry also represents a major source of economic activity and family-sustaining employment. The facilities in Pennsylvania alone produce \$615 million in annual economic benefit, supporting 3,000 Full-Time Equivalent (FTE) jobs annually. These benefits are concentrated in historic coal communities that face existing challenges in generating economic opportunities for residents.

We commend your leadership on this issue by introducing H.R. 4735, the Mine Affected Community Energy and Environment Act. This legislation is critical to address the health, safety and environmental costs imposed on local communities by our nation's coal mining legacy and continues a longstanding public-private partnership with coal refuse reclamation to energy facilities that remove polluting coal refuse piles and reclaim AML sites.

We support the Mine Affected Community Energy and Environment Act, H.R. 4735 and urge the United States Congress to pass this legislation.

Sincerely,
